Subject: Fruitdale Mag Fire Incident

EPA has collected ash samples as part of our operations with the unified command. Our preliminary data XRF has indicated that the ash may be hazardous waste. This was not expected based on the what we got from the air sampling. Based on this issue, the streets where we are working and based need to be cleaned immediately. Due to that fact that this may be hazardous waste, the city entities can conduct the cleanup. I have utilized my Delegated Procurement Authority to get the ERRS contractor out to provide this service. I have spoke to Alex Kramer and advised him of this. I have also notified Barbara Lee via voicemail. I have directed the ERRS contractor to deploy and be prepared decontaminate the streets in front of the facility.
